Phone no: 0921201038

Skills

Have been developing websites with html,css,and javascript

Recognize problems that can be solved by websites quickly.

- communication skill
- problem solving
- Good at team work
- currently learning react and flutter

Profile

A Computer science student with a passion to solve real world problems with website development. Currently i am in my 3rd year of study in Bahirdar university working on frontend development(html,css and js) and learning react.I spent my time on solving problems that i encounter in my surroundings by developing website but using only frontend limits my ideas that's why i am learning backend development with node js which helps me to implement my ideas.

Other Experience

I have been

- Developing a website that can help students to get information about our campus and the departments it has with in a team, which might have a chance to link with the portal when it is finished.
- **Participating in Entrepreneurship programs:** Participated in entrepreneurship competition in which we were able to be in the top 10 and also gained training & good experience

Education: Computer Science student, BIT campus

I have made this web which helps to find and read books easily
